

US 31 PLYMOUTH TO SOUTH BEND PROJECT ALTERNATIVE ROUTES MAPS

PURPOSE:

The purpose of these Alternative Routes Maps is to supplement the information provided in the US 31 Plymouth to South Bend Study, Draft Environmental Impact Statement (DEIS). As issues are discussed within the EIS, these maps may be used to gain a visual perspective of those issues and a better understanding of possible impacts at large. These maps depict the alternative routes Cs, Es, & G-C for proposed US 31 Plymouth to South Bend. It begins with route maps that depict various issues across the entire area. Then the alternatives are shown in a series of sheets beginning near Plymouth (Sheet 1) and ending at on the south side of South Bend (Sheet 6). To make navigation clear, the route index should be used to identify where each sheet is located along the alternatives.
